AIM OF THE CONFERENCE

Conference that will be held in Budva (15-16 May, 2009) has the aim to gather eminent experts from the field of accounting and finance. The participants of the conference will be experts from the universities, professional associations and professional unions. The main goal of the conference is to define the basic trends, opportunities and directions of further development of accounting, auditing and business finance, and not only from theoretical-methodological sense, but from the aspect of business practice too.

Development and advancement of accounting and auditing profession depend on organization and efficiency of professional associations, contemporary legislative regulation as well as from the quality of education system. Desire to harmonize curriculum of the Faculty of Economics in Podgorica with needs and requirements of accounting practice, (through development of new courses and redesign of existing curriculum), induce us to organize this conference.

It is necessary to emphasize, in the end, that conference will be a good opportunity for critical testing of position and role of accounting and auditing in the conditions of spreading global economic crisis.
